DESCRIPTION

This project provides funding for the design and construction of a new academic building (128,900 gross square feet) supporting the science programs within the division of Health Sciences (Biology), the department of Physical Sciences (Chemistry and Physics) and the Mathematics Department, as described in the Takoma Park Campus Facilities Master Plan, 2002-2012. The science and math complex will be completed in two phases, beginning with the demolition and replacement of Science South, followed by the demolition and replacement of Science North.

Under the application of the State space guidelines, the enrollment growth on the Takoma Park/Silver Spring Campus has resulted in a significant instructional space deficit. The Takoma Park/Silver Spring Campus has a current (Fall 2004) laboratory space deficit of 16,876 NASF and a total space deficit of 90,446 NASF. Even after the completion of the Takoma Park Campus Expansion Project and the King Street Art Center, the 2014 projected laboratory space deficit will be 7,683 NASF and the total space deficit is anticipated to be 24,216 NASF. The construction of the Math & Science Center will address this deficit as well as replace Science North and Science South that are in exceedingly poor condition (as identified in the Collegewide Facilities Condition Assessment, 8/02). In addition, the replacement of Science North and Science South allows the campus to capitalize on site capacities with large buildings, given the restricted development opportunities available on the campus.

Plans and Studies

Collegewide Facilities Condition Assessment (8/02), Collegewide Facilities Master Plan (1/04).

COORDINATION

Fund Sources: G.O. Bonds and State Aid.

State share of project based on anticipated eligible costs. Relocation costs and design fees above approximately 7% of estimated construction costs may not be eligible for State reimbursement.
